## Letter to Shareholders

May, 2018

For the fiscal year ended March 31, 2018, the Piedmont Select Equity Fund (the "Fund") was up 10.62%, which is an excellent absolute return but trailed the Standard & Poor's 500 Index, which was up 13.99%. The factors contributing to the underperformance were varied, but primary among them was a relatively large cash position at 11.6% and underweighting Information Technology ("technology") sector, even though at 19.2% it was the largest sector in the portfolio. The S&P 500 market weight on technology is about 25% and represented a risk we were not willing to take.

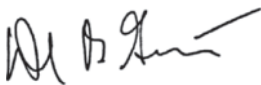

As an illustration, the Fund's best performing security for the year was Ecolab, Inc., which was up 88.79% in spite of being a relatively low technology chemical and water treatment business. Visa, Inc. was up 74.07 % and is considered by some to be a technology stock (including the classification used by the Fund) but is clearly more closely related to finance and payments. The Fund's best performing technology company was ServiceNow, Inc., up 66.76% for the fiscal year and which was sold late in the year to reduce volatility.

Health Care is a sector that has been a leading sector in the Fund's holdings historically and at the end of the fiscal year was still at 13.8%. The Fund's Health Care holdings produced disappointing results as Allergan, Inc. was down 29.60% and Celgene Corporation was down 27.87%. Both were sold for tax loss purposes late in 2017. The Fund's third largest loss was Henry Schein, Inc. at 20.92%, which we continue to hold as the Fund has substantial gains over the purchase price. The company recently announced it would be spinning off its animal health division to Vets First Corporation, which is a start-up company. The Fund will be receiving stock in the tax-free transaction, which we believe will be an attractive addition to the portfolio.

Notable additions this fiscal year were Laboratory Corporation of America, FedEx Corporation, Waste Connections, Inc. and SEI Investments, Inc. SEI Investments, Inc. is up 51.00% since its purchase to become the Fund's largest holding.

2017 was one of those rare years where anything anybody owned did well if not spectacularly. 2018 is already shaping up as more difficult. During the first quarter (the fourth quarter of the Fund's fiscal year) the S&P 500 Index was down 0.76% while the Fund was up modestly. The outlook for corporate profits over the next twelve months looks good but the economies overseas, trade concerns and political currents could overshadow the profit outlook. We expect the current positioning of the Fund to provide results in keeping with the objectives of the Fund to provide long-term capital appreciation.

Sincerely,

David B. Gilbert

## Notes to Financial Statements

March 31, 2018

---

### 1. Organization

The Piedmont Select Equity Fund (the “Fund”) is a non-diversified series of The Piedmont Investment Trust (the “Trust”), which is organized as a Delaware Statutory Trust and is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end management investment company.

The investment objective of the Fund is to provide long-term growth of capital.

### 2. Significant Accounting Policies

In October 2016, the U.S. Securities and Exchange Commission (the “SEC”) adopted amendments to Regulation S-X, which impact financial statement presentation, particularly the presentation of derivative investments. The Fund has adopted these amendments, which were effective August 1, 2017, with these financial statements.

The Fund follows accounting and reporting guidance under Financial Accounting Standards Board Accounting Standards Codification Topic 946, “Financial Services – Investment Companies.” The following is a summary of the Fund’s significant accounting policies used in the preparation of its financial statements. These policies are in conformity with accounting principles generally accepted in the United States of America (“GAAP”).

**Securities Valuation** — The valuation of portfolio securities is determined in accordance with procedures established by, and under the direction of, the Board of Trustees (the “Trustees”). In calculating the Fund’s net asset value (“NAV”), portfolio securities are generally calculated at market value using quotations from the primary market in which they are traded. The Fund normally uses pricing services to obtain market quotations. When using a quoted price and when the market is considered active, securities will be classified as Level 1 within the fair value hierarchy (see below). Securities and assets for which representative market quotations are not readily available or which cannot be accurately valued using the Fund’s normal pricing procedures are valued at fair value as determined in good faith under policies approved by the Trustees and will be classified as Level 2 or 3 within the fair value hierarchy, depending on the inputs used. Fair value pricing may be used, for example, in situations where (i) a portfolio security, such as a mid-cap stock, is so thinly traded that there have been no transactions for that stock over an extended period of time; (ii) the exchange on which the portfolio security is principally traded closes early; or (iii) trading of the particular portfolio security is halted during the day and does not resume prior to the Fund’s NAV calculation. Pursuant to policies adopted by the Trustees, the investment advisor is responsible for notifying the Trustees (or the Trust’s Fair Value Committee) when it believes that fair value pricing is required for a particular security. The Fund’s policies regarding fair value pricing are intended to result in a calculation of the Fund’s NAV that fairly reflects portfolio security values as of the time of pricing. A portfolio security’s “fair value” price may differ from the price next available for that portfolio security using the Fund’s normal pricing procedures. The Fund may be unable to receive the portfolio security’s fair value if the Fund should sell the security. The Trustees monitor and evaluate the Fund’s use of fair value pricing and periodically review the results of any fair valuation under the Fund’s policies.

# The Piedmont Select Equity Fund

## Notes to Financial Statements (Continued)

GAAP establishes a single authoritative definition of fair value, sets out a framework for measuring fair value and requires additional disclosures about fair value measurements.

Various inputs are used in determining the value of the Fund's investments. These inputs are summarized in the three broad levels listed below:

- Level 1 – quoted prices in active markets for identical securities
- Level 2 – other significant observable inputs
- Level 3 – significant unobservable inputs

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement.

The following is a summary of the inputs used to value the Fund's investments as of March 31, 2018:

	Level 1	Level 2	Level 3	Total
Common Stocks .....	\$ 20,555,640	\$ —	\$ —	\$ 20,555,640
Money Market Funds .....	<u>2,711,833</u>	<u>—</u>	<u>—</u>	<u>2,711,833</u>
Total .....	<u>\$ 23,267,473</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 23,267,473</u>

Refer to the Fund's Schedule of Investments for a listing of the common stocks by industry type. As of March 31, 2018, the Fund did not have any transfers into or out of any Level. In addition, the Fund did not have any derivative instruments or assets or liabilities that were measured at fair value on a recurring basis using significant unobservable inputs (Level 3) as of March 31, 2018. It is the Fund's policy to recognize transfers into or out of any Level at the end of the reporting period.

**Share Valuation** — The NAV of the Fund's shares is calculated daily by dividing the total value of the Fund's assets, less liabilities, by the number of shares outstanding. The offering price and redemption price per share are equal to the NAV per share.

**Investment Transactions** — Investment transactions are accounted for on trade date. Realized gains and losses on investments sold are determined on a specific identification basis, which is the same basis used for federal income tax purposes.

**Investment Income** — Dividend income is recorded on the ex-dividend date. Interest income is accrued as earned. Discounts and premiums on fixed income securities are amortized using the effective interest method. Withholding taxes on foreign dividends have been recorded in accordance with the Fund's understanding of the applicable country's rules and tax rates.

**Securities Sold Short** — The Fund may sell securities short for economic hedging purposes. When the Fund sells a security short, it must borrow the security sold short and deliver it to the broker-dealer through which it made the short sale. A gain, limited to the price at which the Fund sold the security short, or a loss, unlimited in size, will

# The Piedmont Select Equity Fund

## Notes to Financial Statements (Continued)

---

be recognized upon the termination of a short sale. The Fund is also subject to the risk that it may be unable to reacquire a security to terminate a short position except at a price substantially in excess of the last quoted price. The Fund is liable for any dividends payable on securities while those securities are in a short position and will also bear other costs, such as charges for the prime brokerage accounts, in connection with the short position. These costs are reported as dividend expense and brokerage expense on securities sold short, respectively, in the Statement of Operations. As collateral for its short positions, the Fund is required under the 1940 Act to maintain assets consisting of cash, cash equivalents or liquid securities. The amount of the collateral is required to be adjusted daily to reflect changes in the value of the securities sold short. The broker may charge interest if a specified portion of the collateral is not held in cash. As of March 31, 2018, the Fund had no outstanding securities sold short.

**Dividends and Distributions** — Distributions to shareholders arising from net investment income and from net realized capital gains (if any) are declared and paid at least annually. The amount of distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from GAAP. These “book/tax” differences are either temporary or permanent in nature. Dividends and distributions are recorded on the ex-dividend date. The tax character of the Fund’s distributions paid during the years ended March 31, 2018 and 2017 was long-term capital gains.

**Estimates** — The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

### 3. Federal Income Tax

The Fund has qualified and intends to continue to qualify each year as a “regulated investment company” under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”). Qualification generally will relieve the Fund of liability for federal income taxes to the extent 100% of its net investment income and net realized capital gains are distributed in accordance with the Code.

In order to avoid imposition of the excise tax applicable to regulated investment companies, it is also the Fund’s intention to declare as dividends in each calendar year at least 98% of its net investment income (earned during the calendar year) and 98.2% of its net realized capital gains (earned during the twelve months ended October 31) plus undistributed amounts from prior years.

# The Piedmont Select Equity Fund

## Notes to Financial Statements (Continued)

The following information is computed on a tax basis for each item as of March 31, 2018:

Cost of portfolio investments .....	\$ 14,245,454
Gross unrealized appreciation .....	\$ 9,034,718
Gross unrealized depreciation .....	(12,699)
Net unrealized appreciation .....	9,022,019
Undistributed long-term capital gains .....	1,290,760
Accumulated capital and other losses .....	(45,589)
Distributable earnings .....	<u>\$ 10,267,190</u>

The difference between the federal income tax cost of portfolio investments and the financial statement cost for the Fund is due to certain timing differences in the recognition of capital gains and losses under income tax regulations and GAAP. These timing differences are temporary in nature and are due to adjustments to basis on publicly traded partnerships.

Net qualified late year ordinary losses incurred after December 31, 2017 and within the taxable year are deemed to arise on the first day of the Fund's next taxable year. For the year ended March 31, 2018, the Fund deferred until April 1, 2018 qualified late year ordinary losses in the amount of \$45,589 for federal income tax purposes.

During the year ended March 31, 2018, the following reclassifications were made as a result of permanent differences between the financial statements and income tax reporting requirements:

Increase in accumulated net investment loss	Increase in undistributed net realized gains from investments	Decrease in paid-in capital
\$ 107,131	\$ 718	\$ (107,849)

Such reclassifications have no effect on the Fund's total net assets or NAV per share.

The Fund recognizes the tax benefits or expenses of uncertain tax positions only when the position is "more likely than not" to be sustained assuming examination by tax authorities. Management has reviewed the Fund's tax positions taken on federal income tax returns for all open tax years (tax years ended March 31, 2015 through March 31, 2018) and has concluded that no provision for unrecognized tax benefits or expenses is required in these financial statements.

### 4. Investment Transactions

During the year ended March 31, 2018, cost of purchases and sales of investment securities, other than short-term investments and U.S. government securities, were \$4,850,059 and \$10,353,344, respectively.

### 5. Transactions with Related Parties

A Trustee and certain officers of the Trust are also officers of Sheets Smith Wealth Management, Inc. (the “Advisor”) or of Ultimus Fund Solutions, LLC (“Ultimus”), the Fund’s administrator, transfer agent and fund accounting agent, and Ultimus Fund Distributors, LLC (the “Distributor”), the Fund’s principal underwriter.

#### INVESTMENT ADVISORY AGREEMENT

Under the terms of an Investment Advisory Agreement between the Trust and the Advisor, the Advisor serves as the investment advisor to the Fund. For its services, the Fund pays the Advisor an investment advisory fee, which is computed and accrued daily and paid monthly, at the annual rate of 0.90% of the Fund’s average daily net assets.

The Advisor has entered into an Expense Limitation Agreement (“ELA”) with the Fund under which it has agreed to waive its investment advisory fees and to assume other expenses of the Fund, if necessary, in order to limit the Fund’s total operating expenses (exclusive of interest, taxes, brokerage commissions, extraordinary expenses, brokerage costs and transaction-related expenses, acquired fund fees and expenses, dividend expense on securities sold short and payments, if any, under a Rule 12b-1 Plan) to not more than 1.35% of the Fund’s average daily net assets. This ELA is currently in effect until August 1, 2018 and may continue from year-to-year thereafter, provided such continuation is approved by the Trustees. Accordingly, during the year ended March 31, 2018, the Advisor waived investment advisory fees of \$89,310. This amount is not subject to recapture in future periods.

#### COMPENSATION OF TRUSTEES

Trustees and officers affiliated with the Advisor or Ultimus are not compensated by the Fund for their services. Each Trustee who is not an affiliated person of the Advisor or Ultimus (an “Independent Trustee”) receives from the Fund an annual retainer of \$3,000, paid quarterly, a fee of \$250 for attendance at each in-person meeting of the Trustees and a fee of \$150 for attendance at each telephonic meeting of the Trustees. The Fund reimburses each Trustee and officer for his or her travel and other expenses relating to attendance at Board or committee meetings.

#### OTHER SERVICE PROVIDERS

Ultimus provides administration, fund accounting, and transfer agency services to the Fund. The Fund pays Ultimus fees in accordance with the agreements for such services.

Pursuant to the terms of a Distribution Agreement with the Trust, the Distributor serves as the Fund’s principal underwriter. The Distributor receives fees from the Fund for such services. The Distributor is an affiliate of Ultimus.

### 6. Contingencies and Commitments

The Fund indemnifies the Trust’s officers and Trustees for certain liabilities that might arise from their performance of their duties to the Fund. Additionally, in the normal course of business the Fund enters into contracts that contain a variety of representations and warranties and which provide general indemnifications. The Fund’s maximum exposure

under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, based on experience, the Fund expects the risk of loss to be remote.

### **7. Subsequent Events**

The Fund is required to recognize in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed as of the date of the Statement of Assets and Liabilities. For non-recognized subsequent events that must be disclosed to keep the financial statements from being misleading, the Fund is required to disclose the nature of the event as well as an estimate of its financial effect, or a statement that such an estimate cannot be made. Management has evaluated subsequent events through the issuance of these financial statements and has noted no such events.

### To the Board of Trustees of Piedmont Investment Trust and the Shareholders of The Piedmont Select Equity Fund

#### Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of The Piedmont Select Equity Fund, a series of shares of beneficial interest in Piedmont Investment Trust (the "**Fund**"), including the schedule of investments, as of March 31, 2018, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended and the financial highlights for each of the years in the five-year period then ended, and the related notes (collectively referred to as the "**financial statements**"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of March 31, 2018, and the results of its operations for the year then ended, the changes in its net assets for each of the years in the two-year period then ended and its financial highlights for each of the years in the five-year period then ended, in conformity with accounting principles generally accepted in the United States of America.

#### Basis for Opinion

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Fund in accordance with the U.S. federal securities law and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion.

## **Report of Independent Registered Public Accounting Firm**

---

Our audits included performing procedures to assess the risk of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of March 31, 2018 by correspondence with the custodian. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

## About Your Fund's Expenses (Unaudited)

---

We believe it is important for you to understand the impact of costs on your investment. All mutual funds have operating expenses. As a shareholder of the Fund, you incur ongoing costs, including management fees and other fund expenses. The following examples are intended to help you understand the ongoing costs (in dollars) of investing in the Fund and to compare these ongoing costs with the ongoing costs of investing in other mutual funds.

A mutual fund's ongoing costs are expressed as a percentage of its average net assets. This figure is known as the expense ratio. The expenses in the table below are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period (October 1, 2017 through March 31, 2018).

The table below illustrates the Fund's ongoing costs in two ways:

**Actual fund return** – This section helps you to estimate the actual expenses that you paid over the period. The “Ending Account Value” shown is derived from the Fund's actual return, and the third column shows the dollar amount of operating expenses that would have been paid by an investor who started with \$1,000 in the Fund. You may use the information here, together with the amount you invested, to estimate the expenses that you paid over the period.

To do so, simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number given for the Fund under the heading “Expenses Paid During Period.”

**Hypothetical 5% return** – This section is intended to help you compare the Fund's ongoing costs with those of other mutual funds. It assumes that the Fund had an annual return of 5% before expenses during the period shown, but that the expense ratio is unchanged. In this case, because the return used is not the Fund's actual return, the results do not apply to your investment. The example is useful in making comparisons because the SEC requires all mutual funds to calculate expenses based on a 5% return. You can assess the Fund's ongoing costs by comparing this hypothetical example with the hypothetical examples that appear in shareholder reports of other funds.

Note that expenses shown in the table are meant to highlight and help you compare ongoing costs only. The Fund does not impose any sales loads or redemption fees. The calculations assume no shares were bought or sold during the period. Your actual costs may have been higher or lower, depending on the amount of your investment and the timing of any purchases or redemptions.
